

Unlimited number of devices

The DMCC is a complete solution which encompasses monitoring of up to 64 different sites and enables recording of an unlimited number of cameras. The DMCC connects, monitors, manages, and records the Vitek SAGA series DVRs and our all new IP family of products: 1 and 4 channel IP servers, our new IP cameras: IR, Box, Mighty Dome IP, and Express Dome IP. (see page 4 for additional information)

Unlimited E-Map

The location of the site does not have to be limited just to one picture or one map. Different views and different angles can be added for strategic Camera placement and status update. Even the direction of each camera may be displayed.

Multiple Monitor Support

The New VITEK DMCC enables separation of its six major features for display on six individual monitors for simultaneous, detailed control and accurate monitoring at a glance.

- 64 channel viewer window with visual cues for live monitoring
- Playback screen with controls
- E-map
- DVR Health Report and Maintenance
- Preview Screen
- Search Window

Status Report

The DMCC reports the status of each channel in real time so that immediate response can be deployed. The visual cues are shown in the following screens:

- 64 channel viewer
- E-map
- DVR List
- Group List
